CAM - Effective Communication & Team-Oriented Problem Solving in Manufacturing

Online with Beth Carter
September 14 - October 12, 2022 8:30 am to 12:30 pm

FREE Online with Bristol Community College

Manufacturing is no longer dirty, dark and dangerous. It has transitioned into a dynamic industry with new technologies.

There are immense growth opportunities in the field of manufacturing.

Courses offered through Bristol Community College through funding from the Center for Advanced Manufacturing.

Bristol's Effective Communication Team-Oriented Problem-Solving class will help participants do just that. This class will provide tools and techniques to help individuals thrive in a dynamic team environment. Several work-style, listening and communication assessments will be used to assist participants in gaining a better understanding of themselves and their communication style as well as the style of others. Emphasis will be placed on understanding the importance of listening, non-verbal communication as well as adapting to changing cultural norms to support individual and team growth.
