

Make It In Massachusetts

Manufacturing The Future

For the Month of May

What Can You Expect:

1

A Free Lesson Plan

A 45 min series of activities and presentations designed to allow students to imagine their futures.

2

Engaged Students

Curated stem based lesson that exposes students to exciting lucrative careers.

3

Exposure to Cutting Edge Technology.

Learn about AR, Nanotechnology, Robotics, the Internet of things and more!

As our world changes, students must learn to respond to these changes in order to manufacture their own future.

Our goal is to expose students to these careers and technologies in order to incite change.

Funded and managed by the Masshire North Central Workforce Board.
